

TRIPLE PUNCH

TRIPLE PUNCH

You're the carpenter and your task is to complete the squares until you've filled the screen. Sound easy? Not when you hear what's trying to stop you. A gorilla, ghost, eraser and burst of fire all wander the paths. The eraser erases uncompleted squares and the gorilla would love to hammer you. But you're not defenseless. With three swift punches you can knock them out, except for the fire which can't be stopped. Each level introduces a larger area to fill so keep moving!

Points are scored by completing squares and knocking out enemies. Connect 2 squares at once, score doubles. Connect 3 at once, it quadruples. Bonus scores between second and third stage.

It's a fast and furious game complete with music that's bound to be a knock-out!

Just one of the many exciting games you can get with the video system of the future!
